DETAILED ACTION

1. This communication is in response to Applicant's amendment filed on 08/23/2007.

2. Claims 1, 3-11, 13-18 and 20-29 are pending in this application.

Allowable Subject Matter

3. Claims 1, 3-11, 13-24 and 27 are allowed.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 25, 26 and 28-29 are rejected under 35 U.S.C 101 because it is directed to non-statutory subject matter, specifically, as directed to an abstract idea.

Software application not claimed as embedded in a computer are descriptive material per se are not statutory because they are neither physical thing nor statutory processes.

The claims recite "an information distribution program" which do not define any structural and functional interrelationships with a general purpose computer for permitting the claimed functions to be realized. In contrast, a statutory claim would define structural and functional interrelationships between data structures or functional

parts and a computer which permit the data functions to be realized. **Applicant is advised to incorporate a computer readable recording medium storing a program that is executed by a computer to perform.....** Thus, the claims are rejected as being non-statutory as described above.
